## *The Mike Conlan Selection Studio*

### At Shelford HQ

With so many exciting products for you to choose from in our unique selection studio, let us inspire and help you enhance your home any way you like!

One of the most exciting things about building, is personalising your home to suit your own style. We are here to help make the whole experience enjoyable. We've designed our Mike Conlan Selection Studio to be a relaxed experience, by bringing together stylish fixtures and finishes all in one convenient area. Our Interior Designers will expertly guide you through the process.

Picking your flooring, to selecting your paint colours for your new home is easy thanks to our selection studio. You'll find an abundance of inspiration and choice with a wide range of products. Our experienced Interior Designers will be on hand to guide you through the process and show you everything from the latest trends and styles.

Our Interior Designers provide the benefit of their experience on everything from functional work space, lighting and home automation to future proof your home with the latest trends and technology: USB access, climate control, positioning of power points, lighting, internet, Kitchen cabinetry, solar and so much more is covered during your consultation.

**Let us help bring your style to life!**

## Quality Assurance

### Our Commitment to Quality

Great value means never compromising on quality, which is why every Shelford Quality Home is built to the highest standard, with full access to your very own Site Supervisor, who inspects and approves work carried out on your home.

### 5 Stage Quality Assurance Inspections

1. Site works and floor slab laid
2. Brick work
3. Roof cover, ceilings and plaster
4. Second fix and tiling
5. Handover

Our internal quality assurance process is our commitment to ensuring a quality build and extra peace of mind, at each stage of the construction process.

From our first meeting, and throughout the home building process, we ensure we work together to bring your vision to life.

With careful consideration of your inspiration and individual needs, our thoughtfully planned homes are distinctively designed with you in mind.

Our home designs, packages and inclusions are flexible & can be customised to suit your lifestyle and budget without exception.

At Shelford Quality Homes we believe that great value means never compromising on quality. Which is why every Shelford home is built to the highest standards, with access to your own Supervisor who inspects and approves work carried out on your home.

# Peace of mind inclusions

## Shelford Build with Confidence Guarantee

### Shelford Lifetime Warranty

Going above and beyond the standard 6 years and offering a 25 year structural guarantee, providing you with added peace of mind, knowing your dream home is built with quality materials and quality trades.

#### 100mm floor slab reinforced with minimum F62 mesh

Going above and beyond an 85mm floor slab and providing a 100mm thick slab reinforced with minimum F62 mesh, for better structural integrity and better control over cracking.

#### Footings reinforced with F8 trench mesh

Footing trenches reinforced with F8 Trench Mesh, a multipurpose steel reinforcing mesh specifically designed to transfer loads to the ground, ensuring the structural integrity of your home for many years to come.

#### Internal/external galvanised steel lintel

Only using galvanised steel lintels, designed and tested to support both the internal and external brickwork above all wall openings in your new home. Together with the brickwork and mortar, our galvanised steel lintels work to form a composite beam with exceptional strength and load carrying capacity.

#### Midland brick double clay brick construction

When you build with Shelford Quality Homes, we guarantee to build your home with two leaves of Midland Brick clay bricks, and to use only Midland Brick Maxi Bricks™ which boast vertical coring for additional load bearing capacity, to construct the internal walls of your home.

#### H2 treated pine roof timbers

H2 treated pine roof timbers create a stronger and more stable roof and ceiling structure, which helps prevent roof sagging and ceiling cracks. The H2 treatment also offers protection against attack by termites and European House Borer and provides increased durability against decay, which in turn extends the life of your home.

#### Protective corner beading to plaster

We understand that your home needs to not only stand the test of time, but it also needs to weather the rough and tumble of everyday life. Shelford Quality Homes guarantees the inclusion of protective corner beading built into the exposed corners of the plastered walls of high-traffic areas in your home as your first line of defence against chipping.

### Value

More value as standard to save you money and provide your home longevity by including 100mm concrete slab with F62 mesh (on an average 200sqm home slab this means an extra 3 cubic meters more concrete compared with 85mm slabs), and reinforced footings with F8 trench mesh in all our Shelford Homes for better structural integrity.

### 25

Year Warranty

Going above and beyond the standard 6 years and offering a 25 year structural guarantee, providing you with added peace of mind knowing your home is built with quality materials and quality trades.

### Shelford Group

Build with Confidence knowing Shelford Quality Homes is proudly part of the Shelford group who have been building quality homes in WA for over 28 years.

### Style

Discover personalised service to turn your house into a home with our Shelford Selection Studio. Helping to bring your style to life.

The specification set in this booklet is correct at the time of printing, however products may be subject to change without notice and we reserve the right to substitute a product with an equivalent product in the event a product is out of stock, superseded or discontinued.

Images may depict fixtures, features, and finishes, such as interior cabinetry, garden design and landscaping, not included in the specification.
